

NITEGLOW® SAFETY TREADS

NITEGLOW® TREADS PROVIDE:

Super bright, long after glow Photoluminescent (glow-in-the-dark) anti-slip stair nosing that meets NYC Local Law 26, 2009 IBC and 2015 IFC code compliance. These nosings are used for exit path markings, steps and leading edge of landings when finding pathways in the dark is a necessity. The use of heat-treated corrosion resistant aluminum substrate with a nearly diamond hard aluminum oxide filler assures long tread life under heavy pedestrian traffic. Especially formulated NITEGLOW® safety surfaces have easy maintenance features.

FEATURES:

- Mill finish extruded aluminum base - abrasive filler
- Lengths to order - up to 8'0" max
- Bright long lasting Photoluminescent
- Smooth easy to clean Photoluminescent area
- High content of aluminum oxide abrasive
- Clean architectural lines
- Sure-hold anchor
- Complies with 2015 International Building and International Fire Codes
- Exceeds ASTM E 2072 standards for photoluminescence

NITEGLOW® SPECIFICATION:

- Provide **M231BF-NG** safety nosings as manufactured by Wooster Products Inc.
- Comply with all requirements of New York City local law 26 (2004) RS 6-1 and RS 6-1A, viz., flammability (ASTM D635-2003), toxicity (SMP 800C), washability (ASTM 4828-1994), radioactivity (ASTM D 3684-2004) and brightness (ISO 17398-2004).
- Nosing base shall be type 6063-T5 extruded aluminum.
- Back area has integrally designed channels filled with not less than 65% virgin aluminum oxide anti-slip abrasive filler in contrasting colors (material Supergrit®).
- Photoluminescent epoxy binder in the front area is to be a fully cured resilient type epoxy; epoxy binder to filler ratio to be 24% minimum for excellent cleanability.
- Photoluminescent epoxy filler (free of hazardous and radioactive substances) shall extend uniformly throughout the filler.
- Leading edge of the photoluminescent strip shall be placed a maximum of 1/2" from the leading edge of the step and must extend the full length of the step.
- Nosings shall finish flush with the top of the traffic surface.
- Coefficient of friction meets or exceeds OSHA standard 1910.22, ASTM and military specifications.
- Smooth Photoluminescent glow area with excellent cleanability.
- Highest possible score of 10 on the ASTM D4829 test.

GUIDELINES FOR THE INSTALLATION OF METAL SAFETY TREADS OR NOSINGS INTO NEW CONCRETE OR STEEL PAN FILLED STAIRS:

The use of very large aggregate in the concrete mix may make placement of the safety nosing difficult.

Safety nosing placement may be difficult in concrete with very low slump.

Place concrete into the stair forms or steel pans as quickly as possible; schedule pour so as to install the metal safety nosings quickly before the initial set of concrete occurs.

Puddle the concrete, tamp the safety nosings to insure proper concrete formation around the anchors.

Remove protective tape (if used) as soon as practical.

Order nosings or treads well in advance of the pour or installation date.

Close stairway after pour; permit no use for 24 hours.
